Dear Sir / Madam,

I am writing to express my strong interest in “ Forsker - Marine konstruksjoner og operasjoner ” role.

I am currently a 5th year master student studying Marine Technology at NTNU & KTH. Last semester I have taken several courses which are highly related to hydrodynamic field. TMR4220 Skipshydrodynamikk lectured by Kourosh Koushan & TMR4217 lectured by Sverre Steen & Marilena Greco. I gained extensive knowledge from both courses and I did also performed well in the exam test (A, B respectively). During my Bachelor’s study, I did also take several theoretical-based and experimental-based courses and achieved well, please kindly find attached transcripts. Numerical analysis was gained when I took my exchange career in the UK within RINA.

I am expected to graduate in Jun 2020 and I am doing a Master thesis regarding underwater technologies supervised by Martin Ludvigsen. I am also interested to be involved in deepsea operation.

I look forward to an interview and for more information, please feel free to refer to my CV or contact me.

Sincerely,
Yaolin Ge
