Application letter to “Business Analyst / Data Scientist”

Dear Hiring Manager,

I am excited to apply for the Business Analyst / Data Scientist position in your Actuarial Reserving and Reinsurance Support team. As a Ph.D. candidate in the statistics group at Dept. of mathematical sciences at NTNU, I have gained extensive experience in data-driven machine learning software system development, data analytics, and statistics. I am also well-versed in agile methodologies and test-driven development, which I believe will be valuable in ensuring an effective and efficient reserving process.

I am passionate about new technologies and eager to learn from others, which makes me a suitable candidate for this position. I am a rapid learner and can easily grasp new concepts from different fields. Additionally, I am an active individual who enjoys training in Taekwondo, sailing, dancing, and playing the piano. I also find skiing and hiking in the mountains to be my ways of meditation.

In summary, I am a structured, effective, and analytical business analyst/data scientist who approaches new tasks methodically and can document and organize tasks in a busy environment. I have a degree in statistics and experience with software development, and I am eager to develop by learning new skills and methods. I am collaborative, analytical, business-oriented, and comfortable using English as my working language.

Thank you for considering my application.

Sincerely,

Yaolin Ge
