

Letter of recommendation

To whom it may concern

Yaolin Ge, was studying Underwater Technology at KTH Royal Institute of Technology in 2019. I am pleased to recommend Yaolin Ge for further studies at Ph.D. on autonomous marine systems. .

I got to know Yaolin Ge in Autumn 2019, when he took my course Underwater Technology. This course requires solid analytical skills and understanding of robotic system and manoeuvring system, as well as independent thinking ability and clear logic from the students. Yaolin has impressed me with his sincere study attitude and strong analytical skills, which convinced me that he possesses great potential in his career.

To be specific, Yaolin has fully shown his critical thinking and study skills in my course and gained the score of A out of A, ranking top of his class. During the course lectures and the course assignments he has positively interacted with me, provided comments and delivered his impressive feedback. Worth mentioning, Yaolin would take his time to research for additional information and make considerations before coming to me for discussions, and sometimes would ask for my advice for supplementary reading materials in order to fill the gap in his background knowledge. While studying at NTNU, Yaolin has been eager to learn and enthusiastic about practical research. His passion and enthusiasm for exploring and learning new subjects is exemplary.

I am confident that he will make an excellent addition to your research team.

Please feel free to contact me if you have any questions regarding Yaolin's qualifications.
