

Letter of Recommendation

To Whom It May Concern:

It is my pleasure to recommend a student of mine, Mr. GE Yaolin, as a worthy candidate for admission to your doctoral program.

I have taught him in the course of *Marine Electric Power and Propulsion Systems TMR4290* during the second semester of the academic year 2018-2019, which requires solid analytical skills and understanding of electric power systems, as well as independent thinking ability and clear logic from the students. Mr. GE, comparing to his other classmates, has impressed me with his sincere study attitude and strong analytical skills, which convinced me that he possesses great potential in this professional field.

To be specific, Mr. GE has fully shown his critical thinking and study skills in my course with satisfying the final result of *A* out of *A*, ranking top of his class. I remember clearly that he would positively interact with me during and after my lectures, make comments and deliver his unique perspectives. Worth mentioning, Mr. GE would take his time to search to research for additional information and make considerations before coming to me for discussions, and sometimes would ask for my advice for supplementary reading materials in order to fill the gaps in his knowledge system. I greatly appreciate his passion and enthusiasm for exploring the unknown.

Generally speaking, as Mr. GE's lecturer, I strongly support his application because he has the potential and talent in his professional field, and it would be greatly appreciated if you could give him your favourable consideration. Thank you for your consideration on Mr. GE's application, if you need any further information about him, please let me know.

Yours Sincerely,

Mehdi Zadeh
