Experience

Norwegian University of Science and Technology

Trondheim, Norway

Ph.D. candidate, Dept. Mathematical Sciences

Aug. 2020 – present

- Design and implement multi-scale data-driven machine learning software systems for remote sensing.
- Develop data-driven models and software to incorporate various in-situ data collected in the ocean to better understand the phenomenon of water mass mixing.
- Deploy and integrate the systems onboard an unmanned robot for several successful field experiments.
- Collaborate and communicate closely with multiple customers including SINTEF Ocean, AURLab NTNU, LSTS, and MARETEC for knowledge dissemination to foster novel ideas.
- Document and publish the results to relevant stakeholders and clients and share knowledge with the public. Three papers were accomplished.
