We are calling all Digital Transformation Talent to join our Strategy & Analytics team!

Arbeidsgiver: Höegh Autoliners**Stillingstittel:** Digital Transformation Talent**Frist:** Snarest**Ansettelsesform:** Fast

Höegh Autoliners is looking for people who will contribute in accelerating the digital transformation of our core processes through identification of areas where technology can improve the customer experience, our operating efficiency and the safety of our fleet. This is a fantastic chance for you to be part of a brand new team with opportunities to lead, support and learn. We will set the team structure based on the successful candidate profiles with different levels of experience to create a good team dynamic.

What will you focus your time on

Develop and continuously evolve our digital strategy and roadmap

- Identify opportunities for transforming processes through technology in partnership with business areas and IT

- Prioritize investment and resource allocation based on business and SMT input

- Maintain and update digital road map and prioritized project portfolio

Ensure successful (on time on budget) implementation of agreed digital project portfolio

- Translate business needs into technical functionality and requirements, and provide recommendation on new technology applications

- Scope, launch and manage projects in close co-operation with business owners and IT

- Provide project management (as required), bridging business, digital opportunities and IT

- Ensure investment case in place before launch and measure ongoing benefit realization

Increase user adoption through communication and training, working closely with HR

- Prepare seamless handover of projects to business owners

- Embed change in underlying business processes and organizational behaviours

- Develop and coach the organization to augment the overall digital maturity

transforming our business to contribute to becoming the preferred green RORO partner on a path to zero goal. If you see yourself as any or all of the above, we'd love to hear from you!

What experience you will bring to the role

Passion and enthusiasm for using digital technology to transform and improve the shipping industry

Ability to read and understand the most recent technical advancements (such as big data, artificial intelligence and machine learning, the internet of things, and cyber security) and connect them to Hoegh Autoliners actual processes, cultural models, and infrastructure

Strong digital transformation project management skills with experience and track record in implementing technology driven process changes, understanding classic issues and pitfalls

Structured and results driven, and yet pragmatic and flexible with an ability to adapt approach to business needs, skills set and culture

Strong communication and collaboration skills to engage stakeholders

Background in technology consulting or a similar role in a corporate environment is a strong advantage

We Offer

Opportunity to work with decision makers at all organisational levels

Exciting career development opportunities in a global, well respected shipping company

Opportunity to be part of a green and digital transformation journey

Attractive benefits including flexible working conditions

A strong diverse and inclusive company culture

A competitive total compensation package

You may submit your application until May 8, 2023.

We believe that building and sustaining a diverse and inclusive environment for working and learning leads to a better workplace, better ideas and more inspiring conversations.

Om arbeidsgiveren

Höegh Autoliners is a global player in Ro/Ro deep sea transportation services and operates the greenest fleet in this segment. The company owns and operates approx. 40 Pure Car and Truck Carriers (PCTCs) in global trade systems, making over 3 000 port calls annually.

Since 2021 Höegh Autoliners has reached a number of significant strategic milestones, including listing on Oslo Stock Exchange, ordering of a minimum of eight new multi-fuel and zero carbon ready Aurora class vessels and continuing our track record of solid performance by delivering a record quarterly financial performance in Q2 2022.

ving net zero emissions in deep sea transportation and supporting our customers in decarbonising their supply chain.
