

Letter of recommendation

To whom it may concern

Yaolin Ge, is studying Small Craft Design at KTH Royal Institute of Technology in 2019. I am pleased to recommend Yaolin Ge for further studies at Ph.D. on autonomous marine systems.

Ge follows our courses for SD 2711 Small Craft Design in the autumn semester in 2019 and is currently doing MSc level project work for signal processing of underwater beacons for AUVs under my supervision and has shown high level of motivation and performance, He has taken good responsibility for his work and has shown interest for the given tasks related small craft design. His knowledge and systematic mind set has impressed me.

Generally speaking, as Mr. GE's supervisor, I strongly support his application because he has potentials and talent in his professional field, and it would be greatly appreciated if you could give him your favourable consideration.

Kindest regards

Jakob Kутtenkeuler
