Software Developer

Arbeidsgiver: Sandvik Coromant

Stillingstittel: Utvikler

Frist: 18.04.2023

Ansettelsesform: Fast

Are you a tech-savvy full stack developer who wants to contribute to a variety of development tasks in our backlog and development journey? Then you might be our new Software Developer!

What we do

At Sandvik Coromant in Trondheim, Norway, our product team develops and maintains pioneering sensorized tooling solutions, covering topics including electronics, mechanical design, firmware, software, automation, and algorithm development. You will be at home in the software part of our team, focusing on our customer-facing software applications, but involved in the whole development process.

About your job

In this role, you work in close collaboration with your team to secure a high-quality product. We're an agile team with responsibility for the end-to-end engineering aspects of multiple digital product

deliver user value based on product roadmaps, customer feedback and past experiences and you keep an eye on emerging technologies, competitors and what's going on in the academic world to always stay two steps ahead!

About you

We're looking for someone with a university degree in computer science combined with a couple of years work experience as a code developer – either as a full-time job or as a work alongside your studies where you can show us examples of your work. Your technical skills should match the technologies we use and therefore we see a value of you having knowledge in .NET, C#, Blazor, web tech (HTML/CSS/JS), Bluetooth, databases, Visual Studio, Git, Azure DevOps and other Azure cloud-based tools. We also see it as advantageous with competence within some aspects of machine learning, data and IT security, dynamics, the metal cutting industry, control engineering, as well as networking and cloud-based applications. Acting locally in a global environment calls for excellent communication skills in English and Norwegian or Swedish.

You're a quick learner who are able to easily pick up and understand new tasks, a feature that really comes in handy as we work with many tools and technologies, and continuously add to our toolbox when the world evolves around us. With your good communication skills, you easily build stable relationships, and you truly are a team player to the bone, even though you don't mind working independently. At the end, you're an investigative person who enjoys solving problems coming your way!

Our culture

Innovation is in our DNA and we're proud to shape the future of manufacturing in close collaboration with our customers and partners. We believe in an inclusive, equal and open-minded culture, and we nurture our diversities to form a solid foundation for achieving great results. We provide fair and rewarding benefits, as well as many different career opportunities in an inspiring global environment. Meet some of your future colleagues at our career page or visit our website, LinkedIn or Facebook page to get to know us further.

How to apply

Send your application no later than April 18, 2023. Read more about Sandvik Group and apply at home.sandvik/career (Job ID: R0052972).
