A perfect fit for Software Engineers who would like to develop their career

Arbeidsgiver: Yara International

Stillingstittel: Software Engineer

Frist: 21.05.2023

Ansettelsesform: Fast

[Bli kjent med Yara International](#)

About the Unit

We at Yara are part of a global network, collaborating to profitably and responsibly solve some of the world's key challenges - resource scarcity, food insecurity, and environmental change. Yara People, Process, and Digitalization (YPD) have the overall responsibility for Yara's people and culture development, as well as for technology, architecture, and solutions that enable the digitalization of Yara's core processes and operations. By bringing people and transformation resources, as well as process, digital, and tech capabilities into one cross-functional area, YPD is set to accelerate the transformation.

About the Platform Team

our employees at the production sites and in global functions, improve efficiency and safety at production operations. Our Platform integrates and ingests industrial data from our production sites all around the globe. The team is not only designing and building the Platform but also maintaining, operating, and supporting it.

About the Role

We are looking for a Software Engineer who gets excited about building high-quality, scalable, and reliable distributed services and applications for industrial IoT. In this role, you will design and build solutions that will power and scale our Cloud Platform, with a focus on enabling best-in-class services for our product applications running on top of our platform. You will be a valuable member of a cross-functional, autonomous engineering team to build, experiment, iterate, and deliver on new objectives. Above all, your work will impact how we feed the world and protect the planet.

Responsibilities

- Design, develop and operate high-quality services with a strong focus on reliability, availability, and scalability.
- Develop testable, maintainable, and high-quality products and services.
- Take operational responsibility for the platform services that are owned by your team.
- Leverage DevSecOps practices and principles to help scale developer's productivity, and continuously contribute to improve our engineering practices.
- Share knowledge and collaborate with some of Yara's best software engineers.

Profile

- You have higher education with a minimum a bachelor's degree in information technology or similar.
- Recent graduate or up to five years of software engineering experience in the development, architecture, and design of distributed systems - preferably with cloud technologies.
- Experience in modern programming languages such as Kotlin, Java, Python, or similar.
- Experience in building loosely coupled large-scale distributed systems using a microservice architecture style.
- Knowledge about messaging system technologies such as Kafka, AWS SNS, AWS SQS, or Google Pub/Sub.
- Experience with test automation, debugging, and other automation techniques.
- Experience with cloud technologies such as Amazon Web Services (AWS), Azure, or Google Cloud is a plus.
- You are eager to learn, a conscientious worker, and a thoughtful, kind, supportive person that enjoys sharing your knowledge with your colleagues.
- You value team success over personal achievements

Additional Information

define your own objectives, which align with your mission and the business strategy, shape your own roadmap and work to deliver value each step along the way.

Be a key contributor to sustainable global change, reducing carbon emissions while financially supporting growers and enabling the global transformation of farming and its impact on the environment.

You would be working with a globally dispersed and diverse team. We adopt a hybrid approach, where we encourage face-to-face collaboration but are focused on recruiting the best talent.

Support for personal development with internal knowledge sharing - Any specific training available.

What do we offer?

A flexible, hybrid working model including two days of 'work from home per week

An international, dynamic environment in a truly global organization

Professional development through continuous learning and upskilling offerings

Competitive compensation and benefits

Additional perks include employee activities and well-being programs

Apply no later than

21st May

Please provide your documents in English and please apply for the role only through the relevant job portals. All emails with documents like resumes & cover letters etc. will be deleted due to GDPR rules.

Om arbeidsgiveren

Yara grows knowledge to responsibly feed the world and protect the planet, to fulfill our vision of a collaborative society, a world without hunger and a planet respected. To meet these commitments, we have taken the lead in developing digital farming tools for precision farming and work closely with partners throughout the whole food value chain to develop more climate-friendly crop nutrition solutions. In addition, we are committed to working towards sustainable mineral fertilizer production. We foster an open culture of diversity and inclusion that promotes the safety and integrity of our employees, contractors, business partners, and society at large. Founded in 1905 to solve the emerging famine in Europe, Yara has a worldwide presence of about 17,000 employees and operations in over 60 countries.
