Arbeidsgiver: DNB Bank ASA

Stillingstittel: Software Engineer Backend

Frist: 10.04.2023

Ansettelsesform: Fast

[Bli kjent med DNB](#)

About Us:

PM Digital Labs is a small and targeted team with responsibility to accelerate innovation and solve strategic business problems for the retail market of DNB by using cutting-edge and established technology. We are looking for backend developers to join our growing DevOps team.

What are we looking for?

We are looking for two backend developers who are passionate about technology and smart ways of creating values for our customers.

You are someone who:

Thrives in start-up kind of a set up and feels at home in a high-paced environment

Eager to learn new technologies and domains

Enjoy technical discussions, communicate clearly, and are eager to both gain and share your knowledge and experience with your team members

Comes up with new ideas and like to be inspire and be inspired by others

What does your day look like?

As a developer you will be a part of a trust-based team consisting of architects and developers, located in DNBs headquarter at Bjørvika Oslo. The DevOps team is building solutions spanning several businesses- and tech areas in DNB. We as a team are involved in idea generation and responsible for the IT solution from design, implementation, testing, production to operations.

You as a developer will be responsible for developing solutions and delivering quality code with rock-solid security and quality. This requires that you work closely with our architects, tech leads and other developers and communicate your thoughts clearly to the team. Our focus on stability means that you must write testable code that can adapt to change.

Your knowledge and skills:

- Proficiency in programming languages such as Java, Kotlin, Python, or C#

- Hands-on experience with public cloud-based infrastructure and services, on platforms such as AWS or Azure

- You have worked with continuous integration and deployment (CI/CD) and have a good understanding of software development and testing

- Experience in working in DevOps culture with knowledge of DevOps practices, including infrastructure as code, security, monitoring, and logging

- Experience in developing frontend / web clients is a plus but not mandatory

- You have excellent communication skills, both verbal and written in English

- Ability to work on multiple tasks, prioritize tasks, and experience with agile methodologies such as Scrum and Kanban and tools like JIRA and GitLab

You are not expected to have experience with all these technologies, if you have good amount of experience with development in general and are curious and eager to learn.

What's in it for you?

Challenging tasks that allow you to grow professionally, competitive terms, a strong engineering culture and good career opportunities We offer good pension conditions, employee terms on DNBs products, insurance schemes, access to resorts in Norway and abroad, sports, cultural and other activities plus a wide range of discount schemes In addition, knowledge and experiences are our most important assets, so you will have the opportunity to participate in conferences and courses, both to build your own competency and to represent DNB externally We also have flexible working hours, extra days off and reduced working hours from May to August, and a hybrid way of work.

Do you want to be our new Developer and colleague?

Om arbeidsgiveren

Our people are the DNA of DNB. Since 1822, bright minds have worked together to find the best solutions for our customers. Today, DNB is much more than Norway's largest bank, and a key player in the Norwegian economy. We are a technology driven financial institution, constantly adapting our operations and tailoring our services to the time we're living in and to the future.

In DNB, you'll find a wide range of career opportunities in Norway and internationally. We are among
